

Minutes for our first meeting

Date: 2nd March 11:30am

Absent: Sage,

Place: 10T1 Building

Minute taker: Zhishang

We meeting with our client Sophie

Target:

Among 300 pictures of Japanese writing, tell how many author, how many groups that we can tell that are similar.

Points make out:

For better analyzing for HAT, we need develop a system that automatically cut the unnecessary part of leaflets.

1. A paper that introduce MSRF Network classification. This paper shows that they research on English.
2. Gaussian nearest neighbor.
3. Our computer may not have enough power for calculation.
4. Transformer
5. Get Teams, Miro, Github.

Sophie: writing in different pen or writing tool. One leaflet/writing may have different author, usually one author for each.
